Daniele Buetti

It´s all in the mind
22.05.2014 - 31.08.2014
Schirn Kunsthalle, Frankfurt am Main, DE

The sound installation by Swiss artist Daniele Buetti in the SCHIRN rotunda will be based on an approximately twenty-five-minute audio experience which engages the visitors directly by way of hypnosis techniques. Through an act of speech, the listener will gain access to a spiritual dimension that helps him recharge his intellectual and spiritual resources.

At the core of the work will be a so-called "color cleansing" — a guided meditation free of burdensome feelings and thought patterns. The visualization of various colors — orange, yellow, green, blue, etc. — with the aid of language will be as strongly suggested by Buetti's hypnosis as is its psychological impact. In this purifying, consciousness-raising ceremony, the phenomenon of color will operate as a proxy or thing on which a person is capable of focusing without regard for semantic differences or cognitive misunderstandings. Ultimately, all that counts is the word, the sound, the effect.
