Katja Davar

Globe of Glass
03.05.2023
Fraunhofer Institut, Kassel, GER

In 2020, Katja Davar won the competition for a site-specific artwork for the Fraunhofer Institute in Kassel. Her proposal engaged with the institution's multifaceted research into various areas of energy futures and distribution.

The artwork "Globe of Glass" is a marble floor mosaic consisting of circles and a variety of shapes. These signs refer to the Mesopotamian cuneiform symbol for sun.
