“On the occasion of the art festival 48 Hours Neukölln with the annual theme“ New Authenticity ”, the Kunstverein Neukölln brings together the artists Tom Früchtl, Ben Greber and Lena von Goedeke. These negotiate the complex relationship between reality and fiction in the visual arts and ask about the parameters that are needed to identify spatial and representational experiences as real. You demand a keen eye from the viewer, follow the artistic strategy of minimum effect with maximum effort. "
